Hiring Manager

Numeral IOT

2nd Feb 2023

Dear Hiring Manager,

I am writing to express my interest in the position of Full Stack Developer at Numeral IOT Informatics. I am an experienced Python developer with a deep understanding of python web frameworks including Flask Django and FastApi. I am thrilled to show off my technical expertise and leadership skills as part of Numeral IOT software engineering team.

As a seasoned Python developer, I have extensive experience in various ORM libraries and have the ability to integrate multiple data sources into a cohesive system .I also have a good understanding of server-side templating languages such as Jinja 2, and have extensive knowledge of front-end technologies like JavaScript, HTML5, and CSS3.

I recently completed a Nanodegree in Full Stack software development where I had the opportunity to build and design a database for a software application, deploy a database backed web API, secure and manage user authentication and access control for the application backend and deploy the application to cloud using Docker and Kubernetes.

With my expertise in Python, web development, and database integration, combined with my strong unit test and debugging skills, I am confident that I can make a valuable contribution to your team. I would welcome the opportunity to discuss further how I can help you meet your goals.

Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Edwin Rimui
